

ARC CITY WATER SYSTEM OVERVIEW

ARC's city water systems are an alternative to recirculation systems when splash pads are in a controlled environment with limited usage times or when systems and selected water play elements are designed for minimum water consumption. City water systems are a cost effective approach for a splash pad project when water consumption issues are not a concern. Water reclamation may be routed to a retention pond and used as means of irrigation.

ARC DOMESTIC SYSTEM CONSISTS OF THE FOLLOWING COMPONENTS:
(SEE SEPARATE PRODUCT INFORMATION FOR SPECIFIC FEATURES)

- * SYSTEM CONTROL PANEL
- * WATER DISTRIBUTION MANIFOLD
- * DRAIN-TO-WASTE OUTLET(S)
- * ACTIVATION BOLLARD
- * OPTIONAL PREFABRICATED DISTRIBUTION VAULT SYSTEM
- * OPTIONAL ABOVE GROUND ENCLOSURE
- * OPTIONAL FEATURE SEQUENCING SYSTEM
